

## 4 ARM X-Y CALIPER TOOL

Four articulated arms measure an electrical signal directly proportional to the expansion of the caliper arms to measure borehole size. All four arms are completely independent enabling the capture of four radii readings. The XYT is combinable with all TTI open hole tools. Place anywhere below the Gamma Ray/Spectral Gamma Ray (GRT) tools, but above the Phased Induction Tool (PIT).

Calibrate the XYT using Centralizer Check rings with inside diameters of 8 inches and 14 inches.

### SPECIFICATIONS

**Pressure:** 20,000 psi / 1,379 bar

**Temperature:** 325°F / 163°C

**Weight:** 120 lbs / 54.4 kg

**Tool Length:** 7.41 ft / 2.26 m

**Transport Length:** 9.22 ft / 2.81 m

**Tool OD:** 4.27 in / 10.85 cm
